

Suspension of the Stock Market Trading Session on Tuesday 2/11/2021

November 02, 2021

In light of a technical glitch in the trading screens for some brokerage companies, the trading session for the listed stock market has been suspended for today Tuesday 2/11/2021, and the work is under process to fix the technical problem.

The decision to suspend the trading session this day comes in order to achieve the principle of justice and equality for all broker members in the stock exchange, so that all member brokerage firms have the opportunity to access the system and work at the same time.
